## Point to Point Scatter 18<sup>th</sup> October 2018

### Rules and Regulations

**Forward:** There will be 32 points in total on the map, all of which will be at key features on the map ie. Footpaths, white roads, spot heights, gradient arrows, cross roads etc. At each "point" a board will be displayed (sample will be shown at the start) giving a) that "points" number, b) a two digit code to be recorded on the answer sheet, (for proof of visiting) and c) the location of the next kilometre square for the next "point" to be visited.

Example: **7 4Y 2875** would mean that it's at no. 7 on the answer sheet, where you will record the code 4Y and the next "point" to visit will be in square 2875 and you will be told that its on a feature such as footpath, spot height etc. In this example, if it states a spot height, you will notice there are 2 in this square, TOUGH you will have to check them both, it could be either. LUCK will dictate if this happens. From your first "point" you should attempt to visit 24 (three quarters) but make sure you have time to return to the finish on time.
